EXPERIENCE

Software Engineer

Nov 2025 – Present

UnstableML (Startup)

- Architected Google OAuth + JWT authentication system with Auth.js, implementing secure session management, token refresh, and protected route middleware across a production Next.js application
- Built real-time 3D scene editor using React Three Fiber, integrating FAL for text-to-3D and image-to-3D generation with physically accurate scaling, animated camera paths, multi-segment model motion, and live WebRTC video streaming
- Designed and extended Django REST APIs and WebSocket consumers (Django Channels) to support AI-driven 3D asset generation pipelines, real-time credit billing for live streaming sessions, and a Python agent bridge connecting a Gemini-powered chat planner to a multi-step scene generation orchestrator

Aug 2025 – Dec 2025

CAPP (College Application Planning Platform) — getcapp.com

- Architected and deployed full-stack Next.js/TypeScript platform with Supabase, supporting 1,000+ schools with search, comparison, document upload, and application tracking
- Designed normalized database schema and RESTful API endpoints; integrated PostHog and Google Analytics for user behavior tracking
- Implemented responsive UI with OAuth authentication and secure document storage, serving a production deployment at getcapp.com

Software Engineer

Jun 2025 – Sept 2025

Bloom (Startup)

- Collaborated with founding team in fast-paced startup, contributing to 4+ product features from concept to deployment
- Owned full-stack email-sending feature, integrating OAuth-based Gmail delivery, templates, and rich-text editor
- Built intelligent AI-powered email customization and optimized mobile responsiveness across core pages

AI Software Developer

Dec 2023 – Jun 2024

UCR RoboSub

- Developed computer vision algorithms using OpenCV for autonomous underwater vehicle navigation
- Performed real-time video analysis and implemented edge/corner detection for obstacle avoidance
- Integrated computer vision systems with vehicle's control and navigation systems

DevOps/Software Engineering Intern

Jun 2023 – Sep 2023

Quantum Signal AI, LLC

- Automated bug tracking issue notes generation upon SVN repository commits
- Developed hard drive file cleaning automation by comparing contents to MySQL database
- Gained comprehensive knowledge of Software Development lifecycle from inception through deployment

EDUCATION

BS+MS, Computer Science

Sep 2021 – Dec 2025

University of California, Riverside

Relevant Coursework: Software Construction, Data Structures and Algorithms, Web Development, Database Systems

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, TailwindCSS, Three.js

Backend: Node.js, Python, C++, Django, Flask, SQL, OAuth Integration, API Development

Tools & Technologies: Git, AWS, Docker, OpenCV, Supabase
